the effort to understand personal relationships has traditionally focused on the individual characteristics of participants personal relationships and personal networks takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it author malcolm r parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant's social network a perspective that allows for a better appreciation of our connection to the world and a greater understanding our significant power as social actors this book offers a new way to consider basic notions about how relationships form such as how particular people meet and how

relationships are started among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks and when they believe that network members support their relationship additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships

over one billion people use the internet globally psychologists are beginning to understand what people do online and the impact being online has on behaviour it's making us re-think many of our existing assumptions about what it means to be a social being for instance if we can talk flirt meet people and fall in love online this challenges many of psychology's theories that intimacy or understanding requires physical co-presence the oxford handbook of internet psychology brings together many of the leading researchers in what can be termed internet psychology though a very new area of research it is growing at a phenomenal pace in addition to well studied areas of investigation such as social identity theory computer mediated communication and virtual communities the volume also includes chapters on topics as diverse as deception and misrepresentation attitude change and persuasion online internet addiction online relationships privacy and trust health and leisure use of the internet and the nature of interactivity with over 30 chapters written by experts in the field the range and depth of coverage is unequalled and serves to define this emerging area of research uniquely this content is supported by an entire section covering the use of the internet as a research tool including qualitative and quantitative methods online survey design personality testing ethics and technological and design issues while it is likely to be a popular research resource to be dipped into as a whole volume it is coherent and compelling enough to act as a single text book the oxford handbook of internet psychology is the definitive text on this burgeoning field it will be an essential resource for anyone interested in the psychological aspects of internet use or planning to conduct research using the net

this fully updated fifth edition explores the full psychiatric nursing curriculum from theoretical foundations to application of interventions for commonly encountered disorders the focus is on treatment modalities nursing care therapeutic communication and self-awareness the built-in study guide helps reinforce student learning and knowledge retention abundant features highlight the most pertinent learning concepts

early friends families of upper bucks is a collection of genealogical and historical information pertaining to the first settlers of the upper part of bucks county pennsylvania separate chapters are assigned to each family and approximately 12 000 persons are named and identified the genealogies commence with the first of the bucks county line usually during the period of the eighteenth century but also

earlier and proceed on average through about eight generations
