the language of creation is a commentary on the primeval stories from the book of genesis it is often difficult to recognize the spiritual wisdom contained in these narratives because the current scientific worldview is deeply rooted in materialism therefore instead of looking at these stories through the lens of modern academic disciplines such as sociology psychology or the physical sciences this commentary attempts to interpret the bible from its own cosmological perspective by contemplating the ancient biblical model of the universe the language of creation demonstrates why these stories are foundational to western science and civilization it rediscovers the archaic cosmic patterns of heaven earth time and space and sees them repeated at different levels of reality these fractal like structures are first encountered in the narrative of creation and then in the stories of the garden of eden cain and abel and the flood the same patterns are also revealed in the visions of ezekiel the book of daniel and the miracles of moses the final result of this contemplation is a vision of the cosmos centered on the role of human consciousness in creation

this handbook provides state of the art treatments of the central issues that arise from the study of the phenomena of bilingualism it explores topics ranging from the bilingual brain to bilingual education

with splc 2005 we celebrated the formation of a new conference series the international software product line conference splc which results from the unification of the former series of three splc software product line conferences launched in 2000 in the usa and the former series of ve pfe product family engineering workshops started in 1996 in europe splc is now the premier forum for the growing community of software product line practitioners researchers and educators splc offers a unique opportunity to present and discuss the most recent experiences ideas innovations trends and concerns in the area of software product line engineering and to build an international network of product line champions an international splc steering committee has

been established and it is the wish of this committee that from 2005 on the splc conference will be held yearly in europe america or asia the technical program of splc 2005 included two keynotes from david weiss avaya usa and jan bosch nokia finland both leading experts with academic and industrial insights 17 full and 3 short research papers organized around the following themes feature modeling re engineering strategies validation scoping and architecture and product derivation eight experience reports describing commercial application of product line practices two panels focused on special topics in product line practice and product line research tool demonstrations ahalloffamesessionthatcontinuedthesplctraditioninaslightlyrevised format in addition the technical program was preceded by a tutorial and workshop day that included ten half day tutorials presented by well recognized experts and several workshops on specific areas of product line research
