this handbook is currently in development with individual articles publishing online in advance of print publication at this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site please note that the online publication date for this handbook is the date that the first article in the title was published online

this book aims to provide a comprehensive review of the state of inclusive education in zimbabwe since the adoption of the philosophy in 1994 while literature exists that accounts for the situation regarding special and inclusive education in zimbabwe there is a need for a more thorough and complete understanding of the state of inclusive education in the country this book explores and reflects on the perspectives of various stakeholders within the zimbabwean education system it offers a conceptual understanding of the implementation of inclusive education in a postcolonial and politically troubled zimbabwe and provides recommendations for policy development and formulation as well as the development and strengthening of inclusive teaching and learning practices the insights offered in this book could have a significant impact on clarifying the roles of stakeholders and ensuring that education provision leads to student support that addresses the needs of all students in zimbabwe

this book presents a global overview of the background to and the current state of crop protection and pest management in cotton crops cotton is one of the most economically important crops in the world and has been grown for centuries but maintaining high yields of good quality requires sophisticated approaches to pest management the introduction and use of pesticides over the decades significantly increased cotton yields but lead to many adverse environmental impacts over time new and alternative insecticides were developed but overuse has enabled pests to develop significant resistance the development of genetically modified cotton varieties with toxins derived from bacillus thuringiensis enabled much improved control of lepidopteran larvae including bollworms but as the toxins had no effect on sucking pests farmers had no choice but to continue using insecticides also some of the new cotton varieties developed in recent times have not adapted to different climatic conditions and the quality of cotton fibre declined as a result this book shows the need for more research to select cotton varieties with high quality fibres suitable for different cotton growing areas and to develop integrated pest management strategies to minimise the use of pesticides it also demonstrates the need for an inter disciplinary approach bringing together plant breeders entomologists plant pathologists agronomists and agricultural engineers to achieve high yields of high quality cotton
