the multilevel fast multipole algorithm mlfma for solving large scale computational electromagnetic problems provides a detailed and instructional overview of implementing mlfma the book presents a comprehensive treatment of the mlfma algorithm including basic linear algebra concepts recent developments on the parallel computation and a number of application examples covers solutions of electromagnetic problems involving dielectric objects and perfectly conducting objects discusses applications including scattering from airborne targets scattering from red blood cells radiation from antennas and arrays metamaterials etc is written by authors who have more than 25 years experience on the development and implementation of mlfma the book will be useful for post graduate students researchers and academics studying in the areas of computational electromagnetics numerical analysis and computer science and who would like to implement and develop rigorous simulation environments based on mlfma

this invaluable text has been developed to provide students with more background for the applications of electricity and magnetism particularly in optics and topics related to research instrumentation for example waveguides both conducting and dielectric are discussed more thoroughly than in most texts because they are an important laboratory tool and important components of modern communications the text therefore modernizes the topics covered in a typical electricity and magnetism text because this approach requires an understanding of the mathematics relevant to the topics the text includes a much more thorough discussion of the mathematics of electricity and magnetism than found in current texts it provides a solid background for students who need knowledge of electricity and magnetism particularly physics majors a

this book deals with the slf elf wave propagation an important branch of electromagnetic theory the slf elf wave propagation theory is well applied in earthquake electromagnetic radiation submarine communication thunderstorm detection and geophysical prospecting and diagnostics the propagation of slf elf electromagnetic waves is introduced in various media like the earth ionospheric waveguide ionospheric plasma sea water earth and the boundary between two different media or the stratified media applications in the earthquake electromagnetic radiation and the submarine communications are also addressed this book is intended for scientists and engineers in the fields of radio propagation and em theory and applications prof pan is a professor at china research institute of radiowave propagation in qingdao china dr li is a professor

electromagnetic wave propagation in turbulence is devoted to a method for obtaining analytical solutions to problems of electromagnetic wave propagation in turbulence in a systematic way the monograph presents the mellin transforms to evaluate analytically integrals that are not in integral tables ample examples of application are outlined and solutions for many problems in turbulence theory are given the method itself relates to asymptotic results that are applicable to a broad class of problems for which many asymptotic methods had to be employed previously

for courses in electromagnetic fields waves electromagnetic waves continues the applied approach used in the authors successful engineering electromagnetics the second book is appropriate for a second course in electromagnetics that covers the topic of waves and the application of maxwell s equations to electromagnetic events
